

ERASMUS+ priorities in Sub-Saharan Africa [Region 9]

Disclaimer: these priorities are to be considered solely within the scope of the Erasmus+ Programme Guide 2026

Nr	COUNTRY	GLOBAL GATEWAY SECTOR	ERASMUS + PRIORITY	DESCRIPTION
1.	ANGOLA	Transport	Road and Rail Infrastructure	Green and digital logistics, and road and rail infrastructure, including tunnels and bridges and traffic-related systems and materials
		Climate and energy	Renewable energy	Solar Park for Rural Electrification Renewable energy distribution in particular along the Lobito Corridor
			Agrifood	Support to key agriculture value-chains along the Lobito Corridor: grains, horticulture, tropical fruits
		Education and research	Technical and Vocational Education and Training (TVET)	Support to TVET in particular in priority sectors for the Lobito Corridor development: transport, logistics, agriculture, renewable energy. Upgrading of the infrastructure of TVET centers, modernizing/updating the curricula, and improving the governance and territorial integration of the TVET centers
2.	BENIN	Transport	Port and road infrastructure	- Sustainable ports - Abidjan-Lagos strategic corridor - Rehabilitation of the Allada-Dassa road on the Cotonou-Niamey strategic corridor
		Climate and energy	Renewable energy	Upgrade of large-scale solar power plant and photovoltaic minigrids by the West African Power Pool in Benin
		Health	Waste management	Treatment plant for wastewater in the west of Cotonou and construction of a

				wastewater treatment plant
3.	BURUNDI	Climate and energy	Electricity	Boosting electricity production and regional interconnections as well as improving access to affordable, clean, sustainable, and renewable electricity for most of the population, including in rural areas
			Agrifood	Sustainable agricultural value chains (bananas, fruit juice, avocados), including improving regional access to market for high-potential agricultural value chains for export to countries in the sub-region and/or to Europe
		Transport	Port Infrastructure	Upgrading the Port of Bujumbura to increase its resistance to climate change and improve the transportation of goods
		Education and research	Basic education and professional/vocational training	Support for basic education and professional/vocational training, including for refugees and returnees, as well as improving governance in the education sector
		Health	Health systems	Improve access to and quality of primary healthcare services and support public institutions to implement reforms aimed at achieving universal health coverage; support to health systems through performance-based financing
4.	BOTSWANA	Transport	Trade and transport facilitation, rail infrastructure	Trade and transport facilitation alongside Strategic Corridors in Southern Africa, North South Corridor Rail block train service
		Climate and energy	Ecotourism and horticulture	Green value chain development for job creation: focus value chains (i) eco-tourism and (ii) horticulture
			Biodiversity and conservation	Biodiversity and conservation management
		Digital	E-commerce, e-payment,	Support to E-commerce, e-payment and cybersecurity

			cybersecurity	
5.	CABO VERDE	Climate and energy	Harbour infrastructure, fishing, sustainable finance	- Harbor infrastructures - Higher education and scientific and vocational training in the area of fishing - Port/maritime security - Global Green Bonds and Sustainable Finance
			Wind energy	Interconnection of several islands (more resilient and efficient-energy grid) creating the conditions for offshore wind energy; building a wind farm and storage project with Cabeolica (public-private enterprise)
			Electricity	Inter-related electricity generation, transmission and storage under the country's National Electricity Plan through the construction of a pump and storage facility
		Transport	Port and ship infrastructure	Mindelo port expansion and rehabilitation of CABNAV shipyard, expansion of Porto Novo cruise terminal
		Digital	Data transmission	Submarine cable, 5G expansion satellite connections and data centre, rural digital connectivity and digital entrepreneurship, e-governance, supporting cybersecurity legislation and local capacity to fight cybercrime
6.	CAMEROON	Transport	Road and port infrastructure	Support to the rehabilitation of bridges, roads, ports and bus networks
		Climate and energy	Electricity	Support to hydropower and photovoltaic systems
			Agrifood	Support to the cotton, cocoa and timber value chains, natural resource management, boosting the food production and entrepreneurship, and private sector involvement
		Digital	Digital	Support to digitalization through boosting entrepreneurship, supporting private

			entrepreneurship	sector, competitiveness of value chains, cybersecurity, e-governance and digital trade
7.	CHAD	Transport	Road and airport infrastructure	Renovation of the runway at N'Djamena airport, refurbishment of the freight and passenger terminals and construction of a bridge in Moulkou
		Climate and energy	Biodiversity, ecosystem and wild-life protection	Promoting climate resilient natural resources governance, protection and conservation of biodiversity and ecosystem services, and fight against wild-life trafficking
8.	Congo Basin Central Africa, West Africa Forests, Sudano-sahelian savannahs of West Africa, Eastern Rift savannahs	Climate and energy	Biodiversity	Priorities: Congo Basin Forest ecosystems, Transhumance landscapes in Central Africa, West Africa Forests, Sudano- Sahelian savannahs of West Africa, Eastern Rift savannahs and watersheds, Transfrontier conservation areas of Southern Africa
9.	CENTRAL AFRICAN REPUBLIC	Health	Health services	Support to access to health services
		Climate and energy	Agrifood	Support to agricultural value chains
10.	COMOROS	Climate and energy	Fisheries	Support to production/processing/export capacity for seafood products/safety at sea and eco-tourism value chain
		Transport	Port infrastructure and trade facilitation	Trade facilitation and strengthening port governance to improve business competitiveness, promote economic growth and job creation
11.	COTE D'IVOIRE	Transport	Urban mobility	Support to urban clean transport and rehabilitation of railways

		Climate and energy	Agrifood and Forest	Support to priority value chains (cocoa, cashew, rubber, palm oil, food crops) and the related business environment, fight against deforestation and forest degradation
			Solar energy	Support to solar energy and storage batteries, including a high voltage transmission line and the development and reinforcements of solar power plants
			Sustainable finance	Global Green Bond and sustainable finance (green and blue bonds)
		Digital	Data transmission	Submarine cable, satellite connections and data centre, rural digital connectivity and digital entrepreneurship, e-governance
12.	DEMOCRATIC REPUBLIC OF CONGO (DRC)	Climate and energy	Harbour infrastructure	Extension of corridor Port of Pointe-Noire/Brazzaville (Kinsasha)
			Agribusiness, energy production and biodiversity	Development of sustainable agribusiness (integrated value chains), including investments in energy and access to water, investments in energy production and distribution in rural areas, biodiversity
			Critical raw materials	Metals
		Transport	Rail and road infrastructure	Rail and road infrastructure, with a focus on green and digital elements, Strategic North-South corridor (Durban-Lusaka-Lubumbashi) North South Corridor Rail block train service
		Digital	Data transmission and e-governance	Support to connectivity and telecom towers; submarine cable; African European Digital Innovation Bridge Network; digitalisation and skills, satellite connections and data centre, rural digital connectivity and digital entrepreneurship, e-governance
13.	DJIBOUTI	Climate and energy	Desalination, solar energy and water treatment	Desalination, solar energy and water treatment, including the extension of a desalination plant, along with the construction of a solar power facility, and a wastewater treatment plant

		Digital	Data transmission	Support to an intercontinental submarine cable system, stretching from Europe to India with intermediate landings in Djibouti
		Transport	Road infrastructure	Rehabilitation of a road section to strengthen transport corridor connecting Djibouti to Addis Ababa
14.	ESWATINI	Education and research	Employability and entrepreneurship	Skills for Youth Employability, Entrepreneurship and Empowerment Programme through strengthening the TVET system and supporting the most vulnerable segments of the population
15.	ETHIOPIA	Climate and energy	Agriculture	Support to sustainable agriculture and agro-industry development in coffee and horticulture value-chains
			Sustainable energy	Sustainable energy
		Digital	Digital transformation	Digital transformation
		Transport	Transport and storage facilities for agriculture products	Cold-storage facility for perishable goods, located at the country's principal inland terminal Modjo Dry with a direct connection to the Addis-Djibouti railway line; competitive and sustainable supply chains to export markets, catalysing the development of a large-scale fruits and vegetables export sector
16.	GABON	Climate and energy	Clean oceans, renewable energies and forestry	Support to clean oceans, renewable energies and forest value chains
17.	GAMBIA	Climate and energy	Agri-value chains, waste management, water and sanitation, and access to electricity	Promoting green economy and decent jobs through sustainable transformation of agrifood systems, improved waste management and water/sanitation and greater access to electricity; with a key dimension of social and climate resilience to continue supporting the stability of the country
		Digital	Data transmission	Submarine cable, satellite connections and data centre, rural digital connectivity

				and digital entrepreneurship, e-governance
		Education and research	Tourism, employability and entrepreneurship	Job creation and development of tourism and creative industries, with a focus on youth; reducing the gender gap in completion rates and the teaching workforce in secondary education to boost the transition of girls to higher education
18.	GHANA	Climate and energy	Solar energy and wastewater management	Renewable energies, with a focus on solar energy and wastewater treatment
			Biodiversity, land use and cocoa	Biodiversity, land use and cocoa
		Transport	Road and irrigation systems	Construction and rehabilitation feeder and farm roads and irrigation system (dams, boreholes and pumping stations) in Northern Ghana
		Health	Pharma	Manufacturing and access to vaccines, medicines and health technologies to boost local manufacturing capacities in Africa and to strengthen pharmaceutical systems to increase equitable access to safe, effective, quality and affordable essential vaccines, medicines and health technologies for all Africans
19.	GUINEA BISSAU	Health	Health infrastructure	Health infrastructure to capitalise on previous investments in the sector: water, sanitation and hygiene
		Climate and energy	Solar Energy	Renewable energy - solar panels
			Agribusiness and TVET	Transition towards green and blue development in key value chains (fisheries, rice, cashew nuts); support to the agribusiness development, and TVET offer and applied research to accompany the agro-ecological transition and natural resources management

		Transport	Road infrastructure	Rehabilitation of the road Bissau/Safim – Sao Domingos-Mpack-Senegal border (Ziguinchor)
		Digital	Submarine cables and connectivity	Submarine cable, satellite connections and data centre, rural digital connectivity and digital entrepreneurship, e-governance
20.	GUINEA	Climate and energy	Water management and electrification	Protection of Guinea's rivers (restoration of springs/major rivers and reforestation) and support to energy with a focus on electrification, including • peri urban distribution in Forest Guinea, • transport line Maneah-Matoto, and • transport line Labe-Mamou
			Employability in the agriculture sector	Support to private sector including through vocational education and training to enhance youth employability (focus on value chains: infant food, fonio, fruits - mango, pineapple- and cashew nuts)
21.	KENYA	Transport	Trade and road systems	Transport and trade facilitation to improve regional connectivity and trade, including the construction of Bus Rapid Transit system in Nairobi
		Climate and energy	Green energy and trade	Green energy production and distribution; green trade and investment
		Digital	Digital skills, cybersecurity and e-governance	Digital for human, including TVET, digital skills, cybersecurity and e-governance
22.	LESOTHO	Climate and energy	Electricity and water	Secure the nation's energy supply and make clean, affordable electricity accessible to all, support access to safe, sustainable, and affordable WASH facilities to rural communities in Lesotho while conserving water and land resources
23.	LIBERIA	Climate and energy	Forests	Support to • Governance of the sector along with the wood value chain

				- Sustainable management of forests and land use combined with conservation and biodiversity protection - Climate and environmental financing opportunities
			Agriculture and fisheries	Support to agriculture and fisheries value chains (rice, fish, cocoa)
		Digital	Data transmission	Submarine cable, satellite connections and data centre, rural digital connectivity and digital entrepreneurship, e-governance
24.	MADAGASCAR	Climate and energy	Hydroelectricity and rural electrification	Renewable and sustainable energy, with a focus on hydroelectric production and rural electrification, such as support to the construction of large hydroelectric dams and their connection to urban centres and rural electrification
			Biodiversity, climate and environmental protection	Environmental and biodiversity protection and climate adaptation to enhance environmental governance, protect ecosystems, while generating jobs in the green and blue economy. This includes conservation of protected areas alongside sustainable development around these protected areas. Reforestation and improved governance in the forestry sector, soil protection and wildlife management initiatives
			Agrifood	Development of agricultural export sectors, particularly coconuts, cactus seed oil, peaches and sugar cane
		Transport	Road and port infrastructure	Construction of road and port infrastructure to enable selected Madagascar's seaports to become major centres in the Indian Ocean and the main import/export hubs with the African continent and Europe. This includes the rehabilitation of transport infrastructure, such as roads, and enhancing skills and providing professional and higher education training to ensure the sustainability of transport projects.
		Education and	Vocational and	Improving the Vocational and Technical Education system through support to the

		research	Technical Education	socio-professional integration of young women with a focus on the needs of the labour market in a gender perspective
		Health	Pharma	Supply and distribution of medicines and medical equipment at a decentralised level for public hospitals
		Digital	Digital infrastructure	Investments in mobile networks covering rural areas, schools, hospitals, government sites, thus fighting the digital divide and bridging inequalities
25.	MALAWI	Climate and energy	Electricity	Upgrade of a power transmission grid
		Digital	Data transmission	Construction of a 10 000 km regional fiber-optic backbone across DRC, Zambia, Zimbabwe, Malawi and Mozambique
26.	MAURITANIA	Digital	Data transmission	Data centre in Nouakchott and submarine cable
		Transport	Infrastructure	Construction of infrastructure and creation of integrated development hubs as part of developing the blue economy
		Climate and energy	Green hydrogen, solar and infrastructure	Development of energy infrastructure with a focus on green hydrogen, including support to a high voltage power line, major green hydrogen related infrastructure, in particular ports, roads, and energy and professional training, extension of a solar power plant, and improvement in the business climate/private sector
			Blue economy	Development of blue economy, with a focus on maritime and land port infrastructure, governance and regulation of the fisheries sector, TVET, private sector and port security
		Health	Health systems	Support the introduction of universal health coverage

27.	MAURITIUS	Climate and energy	Circular economy, renewable energy, environmental and coastal protection, biodiversity	Develop the circular economy, renewable energy, environmental protection, coastal erosion and biodiversity management
28.	MOZAMBIQUE	Climate and energy	Electricity and coastal protection	Improvement of the reliability and sustainability of the power supply, biogas production from treatment of various waste types, enhancement of the capacity of the grid and contribution to the digital transformation of the electricity sector including support to a solar and wind power project and mini grids as well as support to coastal protection
		Education and research	Digital ecosystems	Focus on digital ecosystems, digital literacy and skills for youth, particularly for girls and those living in vulnerable situations, as well as digital start-ups
		Digital	Data transmission	Modernisation of the fiber optic network, focusing on trust, high capacity, and resilience, connecting major cities and extending resilient regional links across Southeast Africa
29.	NAMIBIA	Climate and energy	Hydrogen	Implementation of strategic partnership on renewable hydrogen, including the construction of a solar PV plant combined with electrolyzers, support to financial platforms for green hydrogen and to the regulatory environment
			Critical raw materials	Implementation of strategic partnership on raw material value chains
		Transport	Port infrastructure and urban development	Facilitating the development of port infrastructure and expansion at Walvis Bay and Lüderitz
		Education and research	TVET for green skills	Innovating green networks through industry and TVET empowerment for green hydrogen

30.	NIGER	Climate and energy	Solar power	Expansion of the energy grid, including the construction of hybrid and solar power plants and expansion of the energy network
31.	NIGERIA	Climate and energy	Renewable Energy	Expansion of on grid renewable energy infrastructure including the generation and evacuation infrastructure for on-grid renewable energy hydropower for SME/MSME in the agricultural sector and public health care facilities electrified with solar micro-grid.
			Solar energy, horticulture and agrifood	Connecting renewable energies and the agri-food sectors Provision of combi-tracks solar energy Support to young people in setting up their own business in the agri-food sector or finding a suitable job Support to horticulture in Nigeria
		Education and research	TVET	Modernising and enhancing the capacity of agricultural colleges, technical colleges, and agri-related vocational institutions. Focus on improving training quality and employment transition, particularly empowering girls and women
		Transport	Water transportation	Construction/upgrading of water transportation, promoting gender actions and the use of the inland water transport system by women, the disabled, elderly, children, through better accessibility, safety and comfort
		Digital	Infrastructure, public service and training	Support Nigeria's digitalisation with infrastructure upgrades, public service digitisation, tech start-up support, digital skills training (focusing on youth and women), and robust digital governance for privacy and cybersecurity
32.	REPUBLIC OF CONGO	Transport	Infrastructure	Sustainable connectivity and infrastructure: support for the extension of the multimodal transport corridor from Pointe Noire to Brazzaville-Kinshasa and Bangui
		Climate and energy	Forestry, biodiversity and infrastructure	Climate and green transition: Support the Forest Partnership, strengthening notably forest governance, private sector development, sustainable land use

				and biodiversity conservation, support to renewable energy and climate change resilient secondary cities infrastructures
33.	RWANDA	Health	Pharma and biotechnology	Support education and professional training in the health sector, establish the pharmaceutical and biotechnology sector through reinforcing the pharma ecosystem, health products and technologies value chains
		Climate and energy	Agriculture, climate and minerals	Improving sustainable agricultural value chains, notably through support to the construction of a state-of-the-art wholesale market in Kigali and a focus on climate-smart agriculture and climate resilience in rural areas Development of sustainable and transparent value chains for critical minerals
			Critical raw materials	Sustainable raw materials value chains
		Transport	Transport and trade facilitation	Strengthening transport and trade facilitation by supporting linkages to the Mombasa-Kisangani corridor
		Education and research	Teachers	Pre-primary education access: Support to the pre-primary education sector, TVET and professional training for teachers
34.	SÃO TOMÉ AND PRÍNCIPE	Climate and energy	Agriculture	Agricultural value chains - high added-value exports, improvement of cooperative infrastructures and regeneration, among others
			Renewable Energy	Renewable energy
35.	SENEGAL	Transport	Urban mobility	Harbour infrastructure and management and construction of Bus Rapid Transit

			infrastructure	system, including the upgrade and operation of the port of Ziguinchor, enhancing port access, upgrading facilities to meet international secondary port standards, relocating fishery activities to a dedicated port, maintaining the access channel (river), and providing technical assistance to port management and staff. The EU and its MS are investing significantly in the urban mobility transport, in Dakar mainly but secondary cities will also be supported in the future. The country needs more skill and capacities in this area.
		Climate and energy	Renewable energy	Renewable energies under Just-Energy Transition Partnership
			Agrifood	Agri-value chains (e.g., cereals, horticulture)
		Digital	Digital infrastructure	Last mile connection
36.	SOMALIA	Digital	Data transmission	Support to digital submarine cables
		Climate and energy	Irrigation	Irrigation infrastructure (canals)
37.	SOUTH AFRICA	Climate and energy	Biogas	Biogas production from treatment of various waste types
			Green Hydrogen and Critical Raw Materials	Decarbonisation of the economy Renewable energies, with a focus on green hydrogen Developing the countries' green hydrogen economy by streamlining access to public and private capital, linking finance to policy decisions, reducing transaction costs and accelerating high-quality project development New energy vehicles, such as batteries value chains
		Digital	Cybersecurity	Support to the implementation of Time Synchronization System to improve cybersecurity level of national Air Traffic and Navigation Service
		Transport	Harbour and railway	Strategic North-South corridor (Durban-Lusaka-Lubumbashi)

			infrastructure	- Port Container Terminal Durban - Digitalisation of Durban Community system, blended finance - Support to Transnet's decarbonisation and infrastructural development
38.	SOUTH SUDAN	Climate and energy	Infrastructure and agriculture	Rural infrastructure and support to livelihoods/ food security (value chains fruits/vegetables/gum arabic) in rural areas
39.	TANZANIA	Climate and energy	Critical raw materials	Promoting responsible investment in critical raw materials, including geological mapping and development of graphite and nickel value chains for exports to Europe, while strengthening ESG standards and creating decent jobs
			Renewable energies and water management	Renewable energies, with a focus on hydroelectric energy: construction of a hydropower plant and associated transmission infrastructure; construction of high-voltage transmission lines connecting the power grids of Zambia, Tanzania, and Kenya Water management and sanitation
			Agriculture	Strengthening agricultural value chains (rice, coffee, cashew), focusing on local transformation, processing, value addition, and enhanced access to EU and regional markets
		Transport	Port and urban infrastructure	Develop and upgrade Tanzania's infrastructure including ports, urban mobility, cross-border interconnectors and regulatory systems to strengthen regional integration and trade connectivity
		Digital	Digital infrastructure and services	Supporting digital connectivity by investing in digital infrastructure, digitalising public services, and strengthening digital governance, standards and inclusive regulation Investments in mobile networks covering rural areas, schools, hospitals, government sites, thus fighting the digital divide and bridging inequalities
40.	TOGO	Climate and	Coastal protection	Coastal protection programme using nature-based solutions such as dune

		energy		restoration, groynes and sand replenishments to mitigate the impact of coastal erosion and rising sea levels
			Sustainable agro-business, environmental and biodiversity protection	Sustainable agro-Business, environmental and biodiversity protection
		Digital	Submarine cables and connectivity	Submarine cable, satellite connections and data centre, rural digital connectivity and digital entrepreneurship, e-governance
41.	UGANDA	Transport	Infrastructure	Infrastructure connectivity
		Climate and energy	Forestry and biogas	Forestry value chains, biogas production from treatment of various waste types
			Agriculture	Value Chains (Cocoa, Coffee, Tourism and Horticulture)
			Critical raw materials	Critical raw materials
42.	ZAMBIA	Transport	Rail infrastructure	Railway construction between Chingola-Jimbe-Luacano, Zambia Railways rehabilitation
		Digital	Data transmission	Support to fibre-optic cables as part of a regional backbone
		Climate and energy	Water/dam management	Arch dam rehabilitation across the Zambezi River between Zambia and Zimbabwe
			Critical raw materials	Critical Raw Materials Partnership
43.	Zambia and	Climate and	Electricity	Construction of a high-voltage direct current (HVDC) 330kV transmission line to

	Democratic Republic of Congo	energy	infrastructure	enhance the stability of both the Zambia Electricity Supply Corporation Limited and National Electricity Company networks
44.	Zambia, Angola, Democratic Republic Congo	Transport	Transport infrastructure	Cooperation in transport infrastructure investments; measures to facilitate trade, economic development and transit; and support to related sectors to fuel inclusive and sustainable economic growth and capital
45.	Zambia, Tanzania, Kenya	Climate and energy	Energy interconnector	Construction of a double circuit 400 kV line from Pensulo to the Zambia Tanzania border to enhance regional integration and foster economic development
46.	ZIMBABWE	Climate and energy	Agriculture and biodiversity	Support to two key agri-value chains (horticulture, traditional grains) and renewable energy linked to the value chains, biodiversity and conservation management
			Water/dam management	Arch dam rehabilitation across the Zambezi River between Zambia and Zimbabwe
		Transport	Trade and transport facilitation	Strategic North-South corridor (Durban-Lusaka-Lubumbashi) North South Corridor Rail block train service
		Digital	Data transmission	Support to fibre-optic cables as part of a regional backbone
47.	SUB SAHARAN AFRICA	Digital	Data governance, e-services and data infrastructures	Data governance, e-services and data infrastructures for the benefit of research and education communities - Broadband mapping in Sub-Saharan Africa - Development of a data policy framework building on the AU Data Policy Framework, developing data use cases to showcase the value of data, and supporting the identification of investments - Scaling up of support to Regional and National Research and Education Networks in the acquisition of high-speed digital connectivity networks, e-services and data infrastructures for the benefit of research and education communities

				- Support the Implementation of the Digital Transformation Strategy for Africa 2020-2030 at continental level, establishing conducive regulations that promote regional convergence for affordable, secure, reliable and high-speed connectivity infrastructure and services; and supporting harmonized broadband mapping systems in Sub-Saharan Africa
		Health	Sexual and reproductive health rights, health systems	Digital health services and sexual and reproductive health rights - Reinforcement of capacities for national public health institutes, public health research, public health workforce training and advocacy - Accelerate health systems strengthening and the achievement of universal health coverage through digital health initiatives - Strengthen regional mechanisms to address supply-side constraints and improve access to quality assured sexual and reproductive health-commodities, notably by improving supply chain management systems. - Enhance collaboration and capacity of National Public Health Institutes, public health research, knowledge and information gathering that drive evidence-based policy advice, public health workforce training, and advocacy
			Vaccines (special focus in Ghana, Rwanda, Senegal, Nigeria and South Africa)	Manufacturing and access to vaccines, medicines and health technologies to boost local manufacturing capacities in Africa and to strengthen pharmaceutical systems to increase equitable access to safe, effective, quality and affordable essential vaccines, medicines and health technologies for all Africans
		Climate and energy	Biodiversity	Support to biodiversity conservation in Africa, identifying key landscapes for conservation and development to create jobs, improving security and sustainable livelihoods, while preserving the ecosystems and wildlife that are vital to all
		Transport	Aviation	Development, production and use of sustainable aviation fuels globally, contributing to the attainment of International Civil Aviation Organization's goal of net-zero emissions from international aviation by 2050
